

## 2-DIN MONICEIVER WITH DAB+, USB AND BLUETOOTH

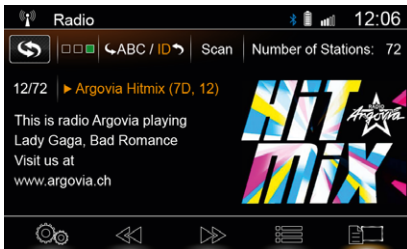

The X-222 is a new 2-DIN moniceiver from XZENT that scores with an ideal combination of product features in many areas. The X-222 multimedia system features a clean and neat front panel, combining a large 6.5" / 16.5 cm capacitive touchscreen with four sensor buttons and a convenient rotary encoder for volume on the left side.

However, the X-222 also provides the best mobile entertainment and digital radio reception with its "par excellence" integrated DAB+ tuner. The tuner stands out with Service Following and its reception performance but not any less with the ease of use, DLS text and MOT slideshow function.

Aside of the FM RDS tuner, the XZENT features two USB 2.0 ports. The first USB port connects to USB memory sticks for A/V playback, but also integrates Android smartphones: The Easy Connect function offers screen mirroring and direct control of Apps on the smartphone via device touchscreen. The second USB port connects to iOS based Apple devices, supporting the "Made for iPod/iPhones" functionality.

The X-222 has two camera inputs (RCA/CVBS) with switched power supply and automatic image control/switching. The dedicated CAM button on the front panel allows to invoke front or/and rear cam(s) manually when needed. The cam video inputs (CVBS) offer auto switching modes to support OE systems with front/rear and rear/rear cam signal setups equally well.

The powerful Bluetooth module offers A2DP music streaming, swift phonebook syncing and a fast dial option for contact favorites.

### DAB+ tuner

Thanks to its integrated DAB+ single tuner with MOT Slideshow, DLS-text and DAB-DAB service following, the X-222 provides crystal clear digital radio reception.

### Capacitive TFT LCD display

The X-222 comes with a capacitive 6.5"/16.5 cm TFT touchscreen display. The totally clear glossy touch panel offers high brightness, clarity and lifelike colour reproduction.

### Learning interface for analog SWC integration

The X-222 provides an „SWC assignment“ in the setup menu, to assign steering wheel remote control buttons. This solution covers vehicles with analogue SWC, upon which the purchase of additional vehicle-specific stalk or SWC interface becomes obsolete.

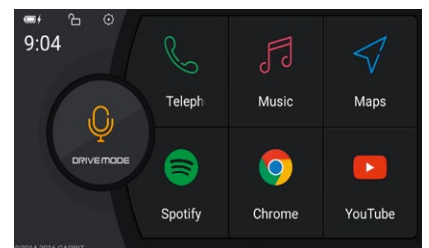

### RDS FM radio

The integrated analog FM RDS tuner has a software DSP for clear, interference- and noise-free radio reception with RDS text display and 18 preset stations.

### Bluetooth hands-free kit

The Bluetooth hands-free system with internal microphone automatically synchronizes the phone book entries of paired smartphones, for immediate availability. The A2DP BT-music streaming further improves the device versatility.

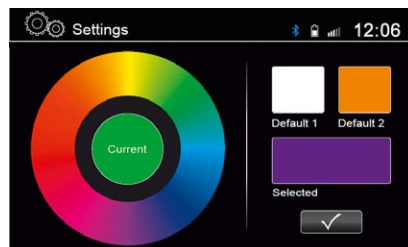

### Easy Connect

With Easy Connect, you can connect your Android smartphone directly to the X-222 and mirror the screen content on the naviceiver's display. Apps are controlled via the touchscreen of the X-222.

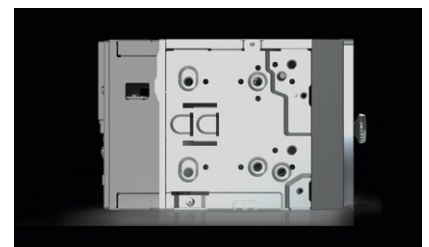

### CAM sensor key

In addition to the FAV button configurable via the system settings, the X-F222 offers a CAM hard key on the front panel of the device, allowing manual control of the rear-view camera.

### Variable illumination color

The key illumination of the four sensor buttons can be adjusted in any color tone for optimum compatibility of the X-222 with the night illumination color of different vehicle brand cockpits.

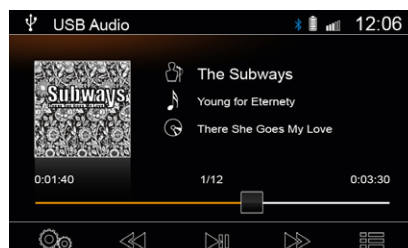

### Shorter housing body

The housing depth of the X-222 is reduced by approx. 20 mm compared to other 2-DIN device models. This is due to the absence of the DVD loader and provides ample air for the connections and cables when installing the device.

### Reversing camera connections

The XZENT X-222 features two RCA video inputs (Cam1/Cam2) to connect two camera systems (front/rear or rear/rear) with switched power and auto switching logic.

### A/V playback

Two rear USB ports, made for iPod/iPhone and a microSDHC port at the front – the X-222 is well prepared and ideally equipped for the latest A/V format playback.

### HDMI input

The HDMI input allows connection of multimedia devices and smartphones with HDMI output to the X-222 for playback of audio and video content.

## KEY FEATURES X-222

### MAIN FEATURES

- 2-DIN DAB+ moniceiver
- Capacitive 6.5"/ 16.5 cm 16:9 touchscreen display
- Graphical user interface supporting 10 different EU languages
- Power supply for DAB+ active antennas (12 V)
- HOME / FAV / CAM and BT sensor buttons
- microSDHC port at front panel for A/V playback
- RGB multicolor key illumination
- IR remote control
- Programmable steering wheel interface (analogue)

### BLUETOOTH

- Bluetooth hands-free module
- Memory-resident phonebook with direct access to sync'd contacts
- Dialling shortcut for 6 favourite contacts
- Internal Bluetooth microphone

### MULTIMEDIA + AUDIO

- DAB+ receiver with MOT slideshow and DLS-text
- FM RDS radio with DSP noise masking
- Two USB 2.0 ports on device backside ( $\geq$  1000 mA charging support)
- EasyConnect for Android smartphones (dual protocol support)
- Made for iPod/iPhone
- A2DP BT-music streaming with AVRCP 1.0
- 10-band graphical equalizer with 14 predefined sound-profiles
- 4 x 40 watts amplifier

### CONNECTIONS

- 4.2 RCA line pre-outs (3 V)
- 2 x RCA video inputs for two camera systems with switched power supply and auto switching for manoeuvring and parking (CVBS)
- 1 x RCA video output (CVBS, NTSC)
- 1 x RCA A/V input with NTSC/PAL auto switching (CVBS)
- 1 x HDMI input for accessories and HDMI compatible mobile devices
- 1 x IR-In input for connection of an external CAN/SWC interface
