

X-402

More than a multimedia system – the infotainer X-402 from XZENT

Smart solution for the cockpit: From XZENT there is now a 2-DIN moniceiver that can easily be expanded into a full sat nav system with an optional navigation microSDHC card

BRIEF

If you are looking for a touchscreen multimedia system for your vehicle, then XZENT with its X-402 has an ultra modern moniceiver with integrated DAB+ tuner, high-quality capacitive 6.2"/15.7 cm touchscreen, integrated Bluetooth hands-free system, and impressive multimedia features in its product range. Even for those who want a versatile sat nav, the XZENT is an intelligent solution: With the X-402-SDFEU navigation micro SDHC card available for separate purchase, the X-402 can easily be expanded to a well equipped navigation system. With a built-in CD/DVD drive, two USB ports, and Made for iPod/iPhone, the X-402 is well equipped for the latest A/V formats. Using the HDMI input, compatible smartphones or multimedia devices can be connected for easy transmission of audio and screen content to the XZENT.

LONG

If you are looking for a touchscreen multimedia system for your vehicle, then XZENT with its X-402 has an ultra modern moniceiver with integrated DAB+ tuner and impressive multimedia features in its product range. Even for those who want a versatile sat nav, the XZENT is an intelligent solution: With the X-402-SDFEU navigation micro SDHC card available for separate purchase, the X-402 can easily be expanded to a well equipped navigation system.

Simply insert the card into the micro SD card slot, and that's it! The infotainer is turned into a naviceiver with map content for 47 European countries, Premium POI package with over 6.5 million points of interest, 3D map views, 3D Auto-Zoom for junctions and roundabouts, and much more.

Of stylish design, the X-402 comes with a very high-quality capacitive 6.2"/15.7 cm touchscreen that impresses with its transparent, high contrast image. The main functions VOLUME, HOME and HDMI are implemented as touch sensor elements, a light finger tap is all it takes to effortlessly control the X-402. Modern, clearly structured HMI pages designed for stress-free mobile use, make for truly intuitive control.

XZENT's new multimedia device provides the most modern entertainment tools, starting with the high-sensitivity FM RDS tuner, and an integrated DAB+ tuner that boasts a host of features. These include DAB station tracking, and the display of MOT slideshows.

With a built-in CD/DVD drive, two USB ports, and Made for iPod/iPhone, the X-402 is well equipped for the latest A/V formats. Added to that is also the option to mirror images and sound on the device through the use of an optional wifi display dongle. Using the HDMI input, compatible smartphones or multimedia devices can be connected for easy transmission of audio and screen content to the XZENT.

The integrated Bluetooth hands-free system is also first class, not only for conveniently dealing with phone calls on the move, but also for streaming music from a smartphone. Synchronization with the mobile phone is automatic, so that phonebook entries are immediately available in resident memory.

The X-402 has two RCA inputs for connecting a front and a rear camera complete with switched power supply, for maneuvering and cam blendoover function. Successful integration in the vehicle is also taken care of: The color of the illumination is freely selectable, and so can be optimally adjusted to the night time illumination of different cockpits.
