

Top Price/Performance: The new XZENT multimedia system X-202BT

Fitting a multimedia system in your car can be so easy: With the X-202BT, XZENT now has a first class 2-DIN moniceiver in its product range sporting the latest features.

BRIEF

Fitting multimedia in the car without wasting time or money? With the X-202BT added to its program, XZENT now has a very high-quality 2-DIN multimedia system with an immense range of functions. Smart looks, and excellent hardware components, paired with modern entertainment features – XZENT’s all-round system makes sure that multimedia in your car will be an inspiring experience. Beside listening to the radio, you can play videos and songs from CD, DVD, SD card, USB device or mobile phone – with the X-202BT all the common A/V formats can be played and conveniently controlled from the high resolution touchscreen display. The new XZENT also scores with its built-in hands-free unit: the many Bluetooth features, audio streaming from mobile phones and an outstanding speech quality for all your calls also make the X-202BT a top quality telephone exchange.

LONG

Fitting multimedia in the car without wasting time or money? With the X-202BT added to its program, XZENT now has a very high-quality 2-DIN multimedia system with an immense range of functions. Smart looks, and excellent hardware components, paired with modern entertainment features – XZENT’s new multimedia all-rounder continues from where the predecessor models, highly praised by the trade press, left off.

The X-202BT is a flexible, versatile entertainer that leaves nothing to be desired: With its built-in CD/DVD drive, USB connection, and SD/SDHC card reader at the front of the device, the XZENT moniceiver is well equipped to playback a range of media and A/V formats, including high resolution videos. Fine image detail and high brightness is provided by the non-reflective 6.2"/15.7 cm 16:9 TFT LCD touch panel with a high resolution of 800 x 480 pixels. Interference-free radio listening pleasure is ensured by a high-sensitivity FM RDS tuner with DSP-based noise reduction.

The new XZENT X-202BT also scores with the built-in hands-free unit: Synchronization of up to 1000 phonebook contacts with 5 call numbers each, immediate access to all synchronized contacts, and direct dialing of 6 contact favorites, coupled with outstanding speech quality for all your calls make the X-202BT a top quality telephone exchange. Thanks to A2DP it is easy to play music from your mobile phone.

As with all XZENT devices, particular attention has been paid to the ease of operation: All settings can be readily controlled via the large touchscreen of the X-202BT. Logically structured screen menus guarantee stress-free mobile use while on the move. The design of the graphical user interface with its fresh, modern look is very attractive and extremely intuitive.

Optimal in-vehicle integration is also taken care of. With its tri-color button illumination, the X-202BT blends in perfectly with different vehicle brands and models. In addition, you can also choose between different wallpapers for the display.

If you want not only crisp pictures, but also top quality sound in your car, then this is the moniceiver for you: For optimal sound performance, the X-202BT has a powerful 4 x 40 watt power amplifier complete with equalizer and 4.1 audio line-outs (each at 3 V output level) on-board.

The multimedia features of the X-202BT are rounded off with two video outputs, one A/V and one video input for the connection of other signal sources, such as DVB-T tuner, DAB+ receiver, external monitor, PlayStation console, or rear-view camera. The X-202BT can be effortlessly connected to a common steering wheel remote control via a CAN stalk adapter, obtainable separately.
